| FEATURES |
|--|
| <ul style="list-style-type: none"> High Cooling Capacity – rapidly cools the room or space and automatically switches to an energy-efficient mode once the desired temperature is reached High Quality Motor – this powers the fans and components, emphasizes efficiency, and reduces noise in the air conditioner. Compressor Protection – this features 3-minute compressor delay that safeguards the compressor by preventing immediate restarts after shutdown Washable Filter & Panel – designed to capture dust and particles, and the washable panel facilitates easy cleaning, promoting a hassle-free and sustainable approach to air conditioner upkeep. Air Fresh Filter – this promotes healthier air by reducing airborne contaminants and pollutants. Hydrophilic Fins – this prevents any type of corrosion through the use of anti-corrosion materials coated on the evaporator and condenser fins. R-32 Refrigerant – a safer more efficient and eco-friendly refrigerant with zero ozone depletion potential and low global warming impact. Compact Design – it maximizes space utilization and provides flexibility in installation options. |

Please be guided accordingly.
